

# Terumo® Dental Needle

Single use

**Contamination-proof  
and clean-cutting  
for anaesthesia  
comfortable to the patient**

# Terumo® Dental Needle

## Wide selection for optimal length

TERUMO® Dental Needle is available in both short and long sizes for conduction anaesthesia and infiltration anaesthesia.

## Minimal patient discomfort

The ultra-sharp LANCET POINT minimises pain and discomfort, and eliminates the need for a surface anaesthesia prior to injection. The high-tensile TERUMO® needle is difficult to break even if the patient moves violently during injection.

## Individual containers

Each needle is individually packed in its own plastic sheath. The colour-coded sealing label provides instant identification of needle gauge and facilitates inventory control.

## Reliable fixing

The needle hub screws directly and securely onto the syringe. It will neither come off accidentally nor leak. Since the needle can be screwed onto the syringe without being taken out of its sheath, sterility is maintained up to the moment of injection.

### Bevel Indicator

The arrow on the hub allows you to align the bevel of the needle for easier insertion.

## Instructions for use

1. Twist cap to break sealing label. Remove cap.

2. Attach needle to syringe by using cartridge sheath as a wrench to screw the needle hub onto the syringe.

3. Immediately prior to injection, remove sheath to expose needle.

## Other features include:

- screw hub locks needle firmly onto syringe
- colour coding identifies needle gauge
- paper seal ensures sterility

Gauge	Colour code	IMPERIAL THREAD - Effective needle length							METRIC THREAD - Effective needle length				
		16 mm	19 mm	21 mm	22 mm	30 mm	35 mm	41 mm	8 mm	13 mm	16 mm	21 mm	35 mm
25G	 Red			DN*2521		DN*2530		DN*2541	DN*2508F			DN*2521B	DN*2535B DN*2535F
27G	 Yellow			DN*2721	DN*2722	DN*2730	DN*2735	DN*2741			DN*2716F	DN*2721B	DN*2735B
30G	 Green	DN*3016	DN*3019	DN*3021	DN*3022					DN*3013B DN*3013F	DN*3016B DN*3016F	DN*3021B	DN*3021F

Needle length cartridge side is always 10.7 mm

Codes with B = needle length cartridge side is 13.2 mm  
Codes with F = needle length cartridge side is 10.7 mm

TERUMO Dental Needle is available with both Metric (blue hub) and Imperial (white hub) threads. For detailed ordering information, please contact your usual supplier or the nearest TERUMO sales office. Package: 100 pcs
